Dear Hangsterfers,

We switched our shop from Cimcool to Hangsterfers S-787 several months ago. This switch has been great for our company. The health benefits alone were the reason for our decision to try something new. Since we have made the transition, the machines are cleaner. Parts come out spotless with no residue. Our shop has a much better odor with no smog lingering. And, our usage has gone down. This is a great product for all CNC machine shops.

Thanks again for a great recommendation.

Brian Zirklebach
