February 23, 2015

We started using Hangstefer's S-500 CF in May 2014 in one CNC center on recommendation from our tooling supplier. We were looking for a coolant that was environmentally friendly and an excellent health rating for our associates. We have experienced good tool wear and tramp oil separation so the skimmer can separate and keep the coolant clean longer. After a three month trial we are very happy with the outcome and have since made the change in all 10 of our CNC centers plus our manual lathes.

Working with the Hangstefer's people has been a great experience. If we had any questions they were answered immediately. Special thanks by George Burrell of Hangstefer's for coming by and checking on us. It's great customer service that keeps a Company successful.
